

## Simplified, flexible Cold Chain management

Features	ROLL 1100
Outer dimensions (mm)	1000 W x 1200 D x 1720 H
Inner dimensions (mm)	805 W x 1010 D x 1370 H
Volume	1110 litres
K value	0,31 W/m <sup>2</sup> .K
Weight	147 Kg
Insulation material	Expanded polyurethane
Material of the walls	Roto-moulded polyethylene

CoolPac's Olivo Roll 1100 is a passively refrigerated industrial quality insulated container. It can make your cold chain simpler, more effective, more flexible, and so more cost effective. Use our Olivo Roll 1100 insulated container to...

- Simplify your fleet management by eliminating the need for refrigerated transport.
- Give you flexible transport options. Rapidly respond to changed shipping requirements by...
  - Swapping eutectic plates for dry ice to transport chilled goods one day and frozen goods the next.
  - Mixing and matching modules to achieve multiple temperature zones in the one vehicle.
- Improve worker effectiveness.
  - Load goods at shift-end, store overnight, deliver next morning.
  - Wheel your Olivo insulated container to and from your packing area.
- Improve delivery van effectiveness. Make your vans capable of carrying a wide variety of refrigerated and frozen goods to smaller delivery points.
- Maintain the integrity of Cold Chain goods while in transition areas.
- Transport frozen goods in refrigerated vehicles.
- Segregate meats for HACCP food safety regulation and religious reasons.
- CO<sub>2</sub> neutral when eutectic plates are cooled using green power.

## Product information

The Olivo Roll 1100 is made of urethane enveloped in polyethylene. The urethane insulates and the polyethylene provides a clean hygienic barrier that protects the urethane.

- Cooled by eutectic plates or Dry-Ice.
- Silent operation.
- Dimensions in accordance with standard transport sizes.
- Modular.
- Durable, hygienic and easy to maintain.
- Performance exceeds ATP (Agreement Transports Périssables) regulations.

### Features

The body and door are made of a single piece of roto-moulded polyethylene.

The door is hinged on two pins. This allows it to be easily removed.

The 2-points "Pélican" closing system is made of rustproof treated steel.

The rustproof treated steel frame is flush mounted and fitted with 2 fixed and 2 swivelling 125 mm castors.

One-piece EPDM seal.

Retracting door stop holds the door open.

Label holder.

Flush-mounted handles (four).

The grooves on the internal walls facilitate the natural convection of cold gas.

### Standard equipment

The foldable plastic coated shelf is made in two parts. This lets you have one full shelf or two half shelves.

### Optional equipment

Eutectic plates TOP 370.

Eutectic plate support (plastic coated or stainless steel).

Dry ice drawer.

SIBER SYSTEM® tank for frozen and chilled products.

Brake wheels (125 mm).

Metal feet (80 mm).

Foldable stainless steel shelf made in two parts so you can have one full shelf or two half shelves.
